### How it works

The decision to provide a loan, guarantee or venture capital/ equity financing will be made by the local financial institution. The exact financing conditions – the amount, duration, interest rates and fees – depends on the financial institution.

## Access to **EU Finance**

The European Union helps you to access finance

Learn more about how to access EU finance by scanning this code

# Access to EU Finance

*The European Union (EU) supports entrepreneurs and businesses with a wide range of EU programmes (2007–2013) providing loans, guarantees, venture capital and other equity financing. These financial instruments are managed by financial intermediaries such as banks, venture capital funds and other financial institutions.*

If you need a loan, a guarantee or if you are interested in venture capital, please visit the following website to locate banks or venture capital funds that provide finance supported by the EU in your country:

<http://access2eufinance.ec.europa.eu>

You can also contact one of 600 Enterprise Europe Network partners, who will be able to provide information on EU and national sources of finance:

[www.enterprise-europe-network.ec.europa.eu](http://www.enterprise-europe-network.ec.europa.eu)

## The EU improves access to finance for small and medium-sized enterprises (SMEs)

### The Competitiveness and Innovation Framework Programme

- provides guarantees in order to increase the supply of debt finance to SMEs
- increases the supply of equity for SMEs

**Structural Funds** enhance the supply of loans, guarantees, venture capital/equity or grants for SMEs. Member States can use part of the allocation of the Operational Programme(s) co-financed with the European Regional Development Fund and European Social Fund for this purpose.

**Progress Microfinance** increases the availability of micro-loans (up to € 25,000), including for disadvantaged and under-represented groups, for starting or developing a microenterprise (with less than 10 employees).

## 7th Framework Programme for Research and Technological Development

The *Risk Sharing Finance Facility* improves access to debt financing for private and public companies undertaking R&D and innovation projects. It targets primarily innovative mid-sized and larger companies.

It includes also a *Risk Sharing Instrument* to increase the supply of debt financing to SMEs and small mid-caps (companies with fewer than 500 employees) that have innovation potential or a focus on R&D and innovation.

## European Investment Bank Group

**European Investment Bank** is the long-term financing institution of the European Union. It improves access to finance for SMEs as part of its support for growth and jobs in Europe.

**European Investment Fund** is part of the European Investment Bank Group and its central mission is to support micro, small and medium-sized businesses.

The European Investment Fund manages a wide range of EU financial instruments which are delivered through financial intermediaries such as banks, equity funds and other financial institutions.
