

# 3<sup>rd</sup> International Rotating Equipment Conference

14 and 15 September 2016, Congress Center Düsseldorf, Germany

## Three forums under one roof

The VDMA as promoter of the Pump Users International Forum, the Compressor Users International Forum, and the EFRC as promoter of the EFRC Conference are pleased to organise their Forums for the third time jointly and simultaneously at the same location.

They will unite the:

- 11<sup>th</sup> Pump Users International Forum
- 4<sup>th</sup> Compressor Users International Forum
- 10<sup>th</sup> EFRC conference

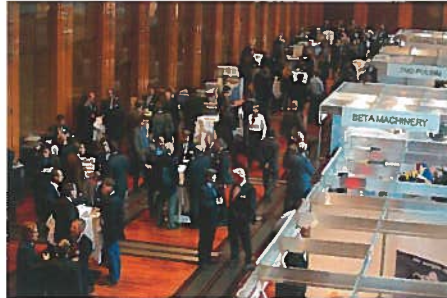

under one roof as the 3<sup>rd</sup> International Rotating Equipment Conference to be held 14 and 15 September 2016 at the International Congress Center in Düsseldorf.

Since its launch as a pump event in 1973 the entire Forum has grown to attract more than 850 participants. There are about 120 technical lectures (pumps, compressors and vacuum-technology) and a technical exhibition with about 85 exhibitors. The community meets in a laid-back atmosphere with excellent opportunities for multidisciplinary contacts. This event is the leading congress of its kind worldwide.

- The core of the conference is the large number of excellent lectures. Quality is our first priority. The lectures are selected by a highly skilled Programme Committee composed out of experts from academia, users and manufacturers.
- Users of rotating equipment can be sure of finding qualified contacts to discuss specific issues – in a group or individually.
- Manufacturers gain maximum exposure for new technical solutions.
- All visitors get the latest news from technical universities.
- Nowhere else has such a high density of expertise on pumps, compressors, compressed air and vacuum technology.

Düsseldorf is the appropriate location for this event. The accessibility by plane, train or car is excellent. The International Congress Centre offers adequate lecture rooms and arbitrary access to all options offered.

- About 120 presentations (pumps, compressors and vacuum technology) in parallel sessions;
- Before the conference, special technical training seminars on specific topics for pumps and compressors (to be announced);
- Accompanying technical exhibition.

## Conference schedule

- Programme brochure available: 29 April 2016
- Training Seminars: 13 September 2016
- Lectures: 14 and 15 September 2016
- Technical Exhibition: 14 and 15 September 2016

## Taking part in the conference

The 3<sup>rd</sup> International Rotating Equipment Conference offers options to suit everyone:

- Present your technical paper;
- Propose topics and take part in our training sessions;
- Book a stand at the technical exhibition; or
- Simply visit the event and listen to the lectures, ask questions, talk to experts and be part of a developing international community.

You can download this document from: [www.introequipcon.com](http://www.introequipcon.com).

## Dates submitting a technical paper:

- Abstracts for technical papers to be given latest: 27 November 2015
- Notice of acceptance to authors: 25 January 2016
- Elaborated technical papers to be sent latest: 15 April 2016
- Review process of technical papers: 30 June 2016

The best paper of each forum gets an award.

## Presenting a technical paper?

For detailed information please contact:  
VDMA  
Pumps + Systems  
Mr. Friedrich Klütsch  
Lyoner Strasse 18  
60528 Frankfurt/Main, Germany  
Phone: +49 69 6603-1286  
Email: [friedrich.kluetsch@vdma.org](mailto:friedrich.kluetsch@vdma.org)

## Exhibiting your product or service?

For detailed information please contact:

VDMA  
Pumps + Systems  
Mr. Harald Frank  
Lyoner Strasse 18  
60528 Frankfurt/Main, Germany  
Phone: +49 69 6603-1293,  
Email: [harald.frank@vdma.org](mailto:harald.frank@vdma.org)

## Attending the conference?

For complementary information please contact:

Maschinenbau Institut GmbH  
Mrs. Nadine Rüth  
Lyoner Strasse 18  
60528 Frankfurt/Main, Germany  
Phone: +49 69 6603-1266  
Email: [nadine.rueth@vdma.org](mailto:nadine.rueth@vdma.org)

## About VDMA

VDMA (Verband Deutscher Maschinen- und Anlagenbau / German Engineering Federation) represents more than 3,100 mostly medium-sized companies in the capital goods industry, making it the largest industry association in Europe. VDMA represents the shared financial, technical and scientific interests of the mechanical engineering industry, especially with respect to national and international authorities and business groups.

## About EFRC

European Forum for Reciprocating Compressors (EFRC) was founded in June 1999 as non-profit association to support European users, manufacturers and scientists working in the field of reciprocating compressors. Its activities cover technology, exchange of experience, creation and enforcement of standards and pre-competitive research. The EFRC's geographical reach has grown from Central Europe to cover first Europe and recently the US, with 46 members in 2015. The aim is to sustain a lively forum combining commercial conferences with an institution promoting the interests of compressor users and the compressor industry.
